

INCUBATION AND ENTREPRENEURSHIP CELL

INTRODUCTION

The Incubation and Entrepreneurship Cell (IEC) of SGRD College of Education is established with the aim of promoting an entrepreneurial mindset among students and faculty members. In today's dynamic and competitive world, entrepreneurship plays a crucial role in economic development, innovation, and self-employment. The cell serves as a platform to nurture creative ideas, transform them into viable ventures, and encourage students to become job creators rather than job seekers.

The IEC focuses on skill development, innovation, leadership, and problem-solving abilities by organizing various academic and practical activities such as workshops, seminars, training programs, expert talks, and startup awareness programs. It also provides guidance and mentoring to students who aspire to start their own enterprises.

OBJECTIVES

- To develop entrepreneurial skills among students by encouraging creativity, innovation, and critical thinking.
- To create awareness about entrepreneurship, startups, and self-employment opportunities among prospective teachers.
- To provide mentoring and guidance to students for developing business ideas and converting them into sustainable ventures.
- To organize workshops, seminars, and training programmes on entrepreneurship, financial literacy, startup management, and innovation.
- To encourage research, innovation, and incubation activities related to education, social entrepreneurship, and community development.
- To build leadership qualities and risk-taking abilities among students to face professional challenges confidently.
- To collaborate with industries, institutions, and entrepreneurs for exposure, internships, and practical learning experiences.
